Sandeep Nadella

Software Engineer @AlignTechnology
San Francisco Bay Area

Summary

Senior Software Engineer with 11+ years of experience designing enterprise integration platforms, distributed backend systems, and cloud-native services utilizing various tech stacks involving NodeJS, Java, Ruby on Rails, Typescript. Experienced in event-driven architectures, APIs, performance optimization, and cross-functional technical leadership, with a growing focus on AI-powered engineering platforms.

Experience

Align Technology
Senior Software Engineer
June 2020 - Present (6 years 5 months)
San Jose, California, United States

• Architected, designed, built fully customizable Data Integration Hub to replace Tibco using node sandbox eliminating the need for point-to-point integrations and specialized integration engineers saving atleast a Million dollars in operating costs
• Designed and built GraphQL schemas and resolvers, RESTful and Non-RESTful APIs, Kafka publish-subscriber models for various features spanning across Virtual Care, Subscriptions Portal, Align Special Markets Portal, Align Diagnostics Subscription, Align Admin Back Office, My Invisalign Web, iOS, Android applications
• Codesigned Subscription-based payment models for use in Vivera Retainers, Align Diagnostics, and Treatment Planning at Invisalign while working with global teams
• Stabilized, and maintained GraphQL NodeJS, NestJS using Prisma ORM and Ruby on Rails code repos for our Consumer Platform, Global Invisalign Experience, Enterprise Engineering teams
• Significantly contributed towards Ruby on Rails, NodeJS microservices at the API, Schema, and System Design levels
• Improved performance of API endpoints by over 40% in some cases across services through SQL, Application layer(ActiveRecord), and API design

optimizations, and through requirement cut-downs when necessary while ensuring system scalability and built backends to serve metric reports
• Supported deployment of docker container stack over Heroku, AWS through Bamboo CICD ensuring Checkmarx, Snyk Security fixes, Unit Test Case integrations
• Guided and mentored Developers, QA, Analysts, PMs across experience levels over project releases and ensured product growth, successful timely deliveries
• Proposed scalable, fault-tolerant, maintainable designs across services
• Built point-to-point integrations involving Google Ad forms and Meta Lead Ad forms(Facebook and Instagram) with Align Lead Service API
• Developed Salesforce connector to exchange CDC, platform events over push topics, PubSub API with Confluent Kafka topics

Arizona State University
Full Stack Developer
February 2019 - May 2020 (1 year 4 months)
Tempe, Arizona, United States

• Built Analytics applications for Student grades for ASU SoMSS, AMLSS departments, MTBI program using Node.js, Angular, Cube.js
• Developed core application features including JSON Web Token(JWT) based application login, Secure file storage in AWS S3, Visual analytics dashboard using Cube.js and Chart.js
• Deployed applications on Amazon Web Services(AWS) and Apache web servers
• Deployed and Maintained Docker-based Open source software such as Opencast for SoMSS, Concerto for CHS departments
• Integrated Concerto with REDCap(Clinical EDC Software for translational research) for the College of Health Solutions department using R language
• Offered technical assistance for the maintenance of High-performance Computing servers, Department and Lab servers involving Bash scripting

Oracle
Senior Software Developer
June 2015 - July 2018 (3 years 2 months)
Hyderabad, Telangana, India

Led the following integration projects
• Commerce-Responsys
- Orders, Profiles and Abandoned Cart sync flows
• Commerce-SiebelCRM

- Order sync flows
• Commerce-Oracle Engagement Cloud for Communications
- Order API and Webhook flows
• Commerce-ProductHub
- File Upload/Download, Products Import/Export flows

• Contributed significantly to the development of Commerce Cloud Adapter by working on Oracle Integration Cloud Services (ICS) SDK
• Led the successful migration of Commerce Cloud internal API documentation to JSON Hyper-Schema, OpenAPI Specification
• Implemented and maintained Swagger functionality of ICS/OIC CC adapter
• Used JavaScript and Java to develop the front end and back end designs for CC-OROMS integration
• Designed XSLT templates for mapping data for Oracle FOM, OROMS and Commerce and implemented Product Hub integration
• Formulated Swagger template based NodeJS custom extensions development for Commerce Cloud

Education

Arizona State University
Master of Computer Science, Computer Science · (2018 - 2020)

National Institute of Technology Warangal
Bachelor of Technology - BTech · (2011 - 2015)
